

1-In the file central/utilities/docbatchimport.php the variable \$converter_path was changed to use the correct mx_path. Also removed the ob_flash(),corrected the return \$cadena; position and fixed the reset file name option.

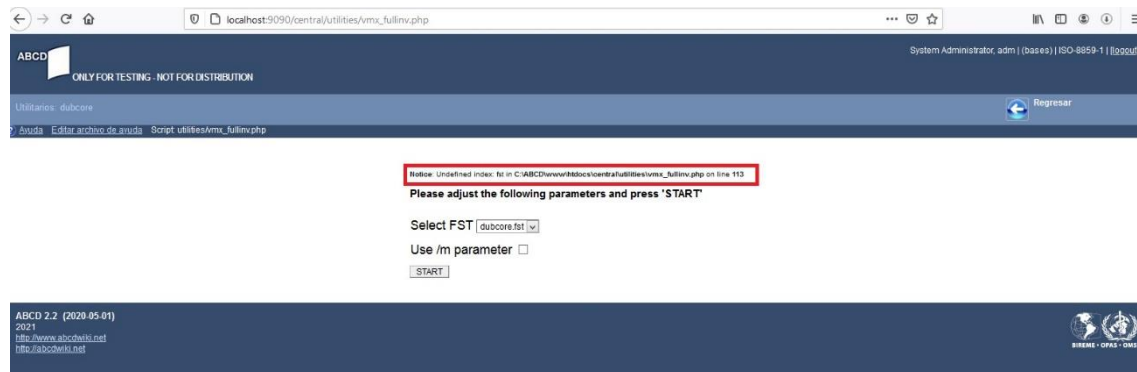

2-It was added the entry in the files bases/lang/es/dbadmin.tab and bases/lang/es_utf8 docbatchimport_filesize=El tamaño maximo de cada fichero debe ser

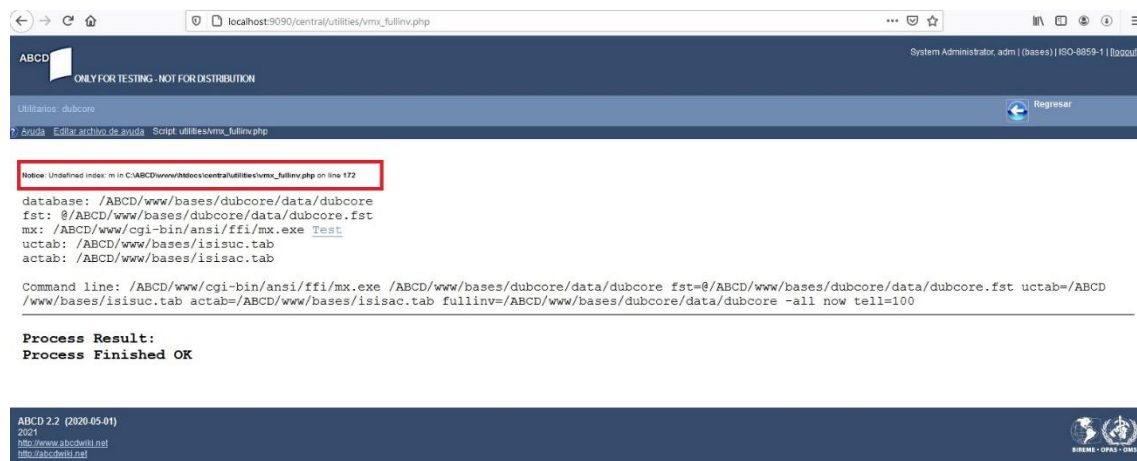

3-The file central/utilities/vmx_fullinv.php was modified to prevent the notices on the browser on line 132 with

`$fst=$_POST['fst'];` by `if (isset($_POST['fst'])) $fst=$_POST['fst'];`

and on line 171 with

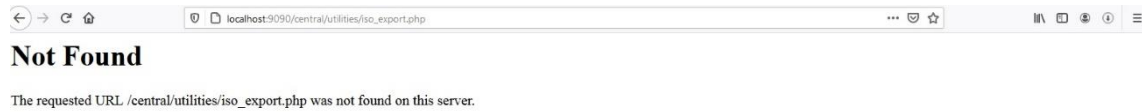

`$m=$_POST['m'];` by `if (isset($_POST['m'])) $m=$_POST['m'];`

4-In the file central/dbadmin/administrar_ex.php was commented out the echo of the wxis file location address.

5- I have to copy files from central/utilities_old to central/utilities, files like iso_export.php, iso_export_ex.php

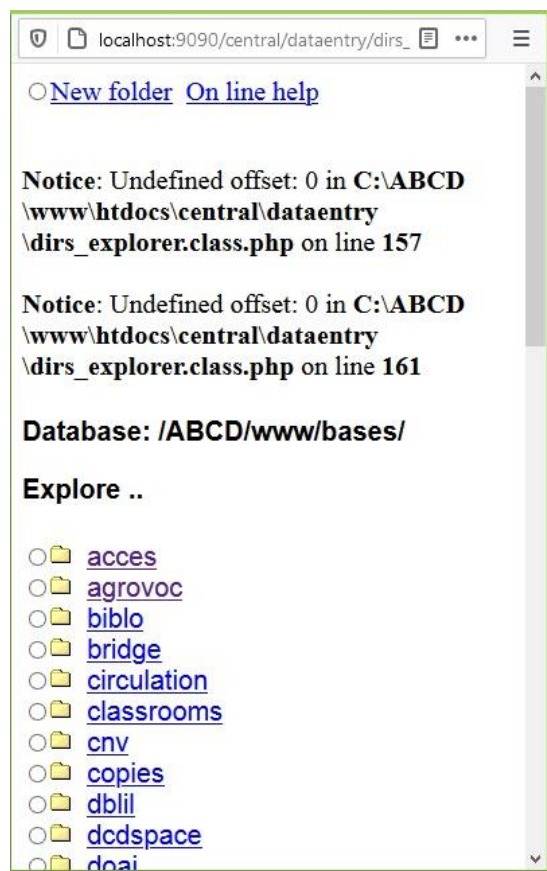

6-On the file central/utilities/iso_export_ex.php on line 123 was added the extension of the file so it will always be a .iso file

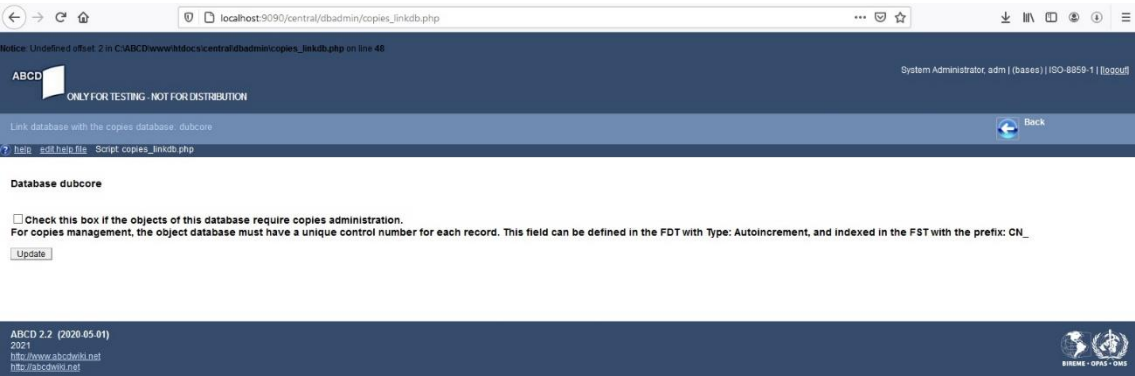

7-I had to replace the file central/utilities/download.php with the one in the central/utilities_old folder.

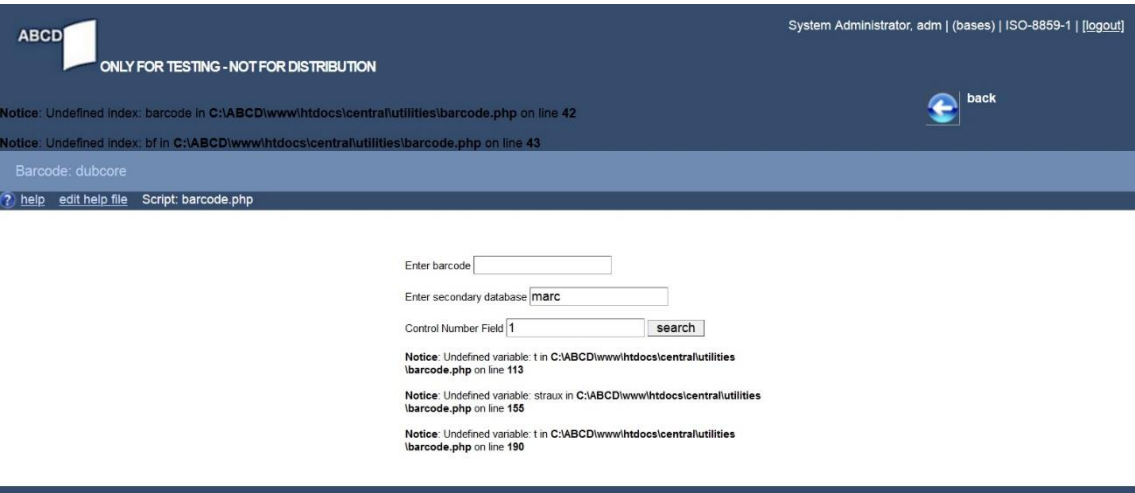

8-The file central/dataentry/dirs_explorer.class.php had problems after selecting a folder and returning back to the root.

9-in the file central/dbadmin/copies_linkdb.php was added an isset() function to prevent notice.

10-In the file central/utilities/barcode.php where corrected the notices and the back button address was change to the correct menu in central/dbadmin/menu_mantenimiento.php

11-The file central/utilities/import_doc.php was modified to correct the warning and notices.

The screenshot shows a web application interface with a dark blue header. On the left, there is a logo with the text 'ABCD' and a square icon. To the right of the logo, it says 'ONLY FOR TESTING - NOT FOR DISTRIBUTION'. Further right, it says 'System Administrator, adm | (bases) | ISO-8859-1 | [logout]'. Below the header, there is a light blue bar with the text 'Import DOC: dubcore' on the left and a 'Back' button on the right. Below this bar, there is a navigation menu with links: 'help', 'edit help file', and 'Script: import_doc_mnu.php'. The main content area is white and contains several error messages: 'Warning: Cannot modify header information - headers already sent by (output started at C:\ABCD\www\htdocs\central\common\header.php:1) in C:\ABCD\www\htdocs\central\config.php on line 97', 'Warning: Cannot modify header information - headers already sent by (output started at C:\ABCD\www\htdocs\central\common\header.php:1) in C:\ABCD\www\htdocs\central\config.php on line 97', 'Notice: Undefined index: fn in C:\ABCD\www\htdocs\central\utilities\import_doc.php on line 99', and 'Warning: Cannot modify header information - headers already sent by (output started at C:\ABCD\www\htdocs\central\common\header.php:1) in C:\ABCD\www\htdocs\central\config.php on line 97'. Below the error messages, there is a 'Digital document import' section. It has a text input field for 'Upload destination on server' with the value 'C:\ABCD\www\bases\dubcore\collection/'. Below this, it says 'Select one or more files' and has a button 'Examinar...' followed by the text 'No se han seleccionado archivos.' and a 'Send' button.

12-The file central/config.php was modified to check if the headers were sent by another page before setting them. The line 97 was modified like this:

```
header('Content-Type: text/html; charset=$charset');
```

by

```
if (!headers_sent()) header('Content-Type: text/html; charset=$charset');
```

13-The file central/utilities/upload_myfile.php was modified to prevent notice:

```
if($_FILES["archivo"]["name"][0])
```

by

```
if (isset($_FILES["archivo"]["name"][0])) if($_FILES["archivo"]["name"][0])
```

14-The file central/utilities/upload_myfile.php was modified to set the upload folder to the ABCDImportRepo of the collection folder

15-The file central/utilities/addloanobject.php was modified to prevent notices
